HARDY PLANTS

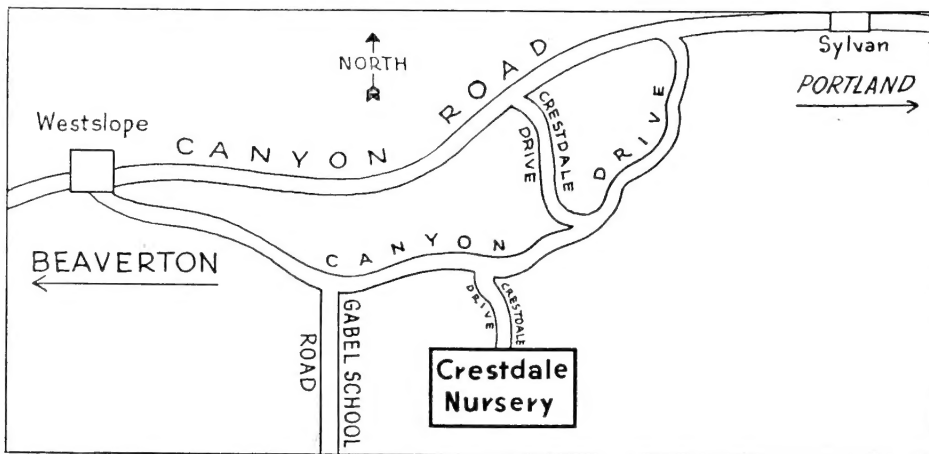

and Seed

CRESTDALE NURSERY

4005 S. W. Crestdale Drive
PORTLAND 1, OREGON

CRESTDALE NURSERY

Marguerite Norrbo

Located at 4005 S. W. Crestdale Dr., Portland 1, Ore.,

Only 4 Miles West from Portland Courthouse.

Telephone: BE. 3285.

We guarantee our plants to be true to name, disease free and of top quality. As time goes on we will add more varieties to our collection of plants, and will always try to select those of showy garden effect, and easy culture, in preference to rare varieties of less garden value.

Prices subject to change at any time.

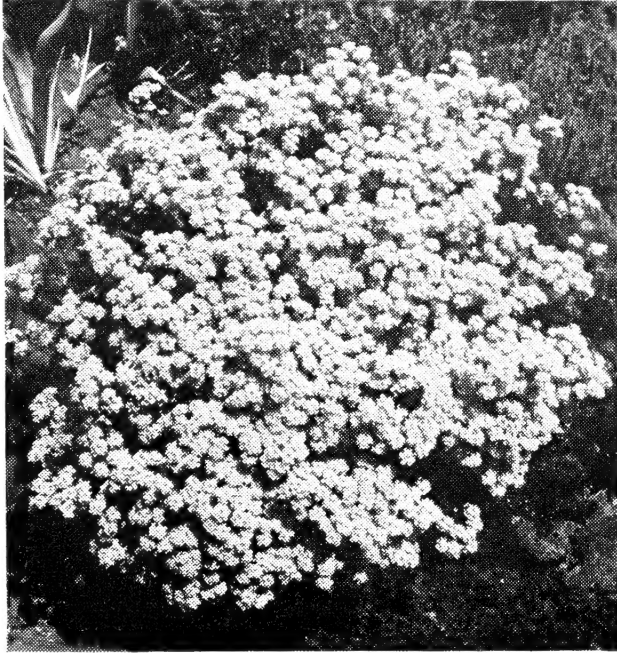

Terms: Remittance with order please. Money order, currency, or for small amount, 2- or 3-cent stamps. Add 15% to help with packing. On mail orders for plants amounting to less than \$2.00 add 20%.

If planning new home grounds, flower borders, rock gardens or shrub borders, we will be glad to give suggestions and plan it with you for a reasonable fee.

ACHILLEA

Achillea—Yellow cushions of grey green foliage and heads of yellow flowers 12 inches high. Early summer. 35c.

ALYSSUM SAXATILE

ALYSSUM

Alyssum — Saxatile Compactum.

Basket of Gold. One of the most popular of spring flowering plants. Masses of yellow flowers 9 inches. April-May. 50c.

Saxatile Fl. Pl.—Double flowering form of saxatile, the double flowers giving a richer appearance to the bright yellow. Plants bloom freely from May on. 9 inches. 50c and 75c.

Serpyllifolium—Masses of silvery gray foliage 4-6" cling close to the earth with masses of soft yellow blooms. Early spring. 50c.

ANDROSACE

Primuloides—A fascinating little plant. The rosettes of silvery foliage branch out on tiny runners to make a colony eventually up to 12 inches across of neat appearance. A dream in late spring when umbels of pink flowers opens on 3-inch stems. 35c.

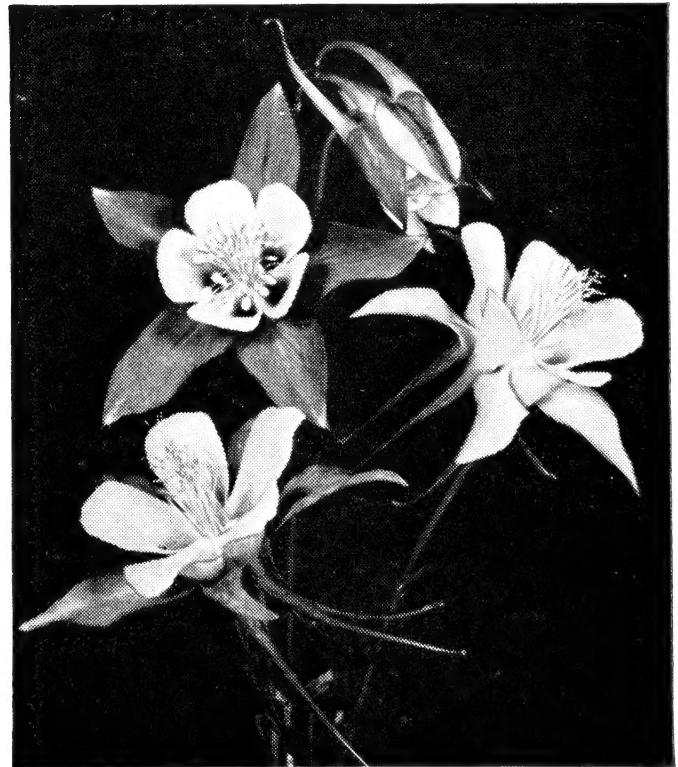

ANEMONE

Rubra—Semi dble. rose red. 50c.

Whirlwind—Semi dbl. white. Valuable plants suitable for massing or as single specimens in the border. Gaining strength and beauty each year. The blooming period extends from September til mid-November. 2 to 3 feet high. 50c.

AQUILEGIA (Columbine)

Long-Spurred Hybrids—Mixture of wonderful colors. From 20 to 30 inches high. 35c and 50c.

COLUMBINE, LONG SPURRED

ARABIS (Rockcress)

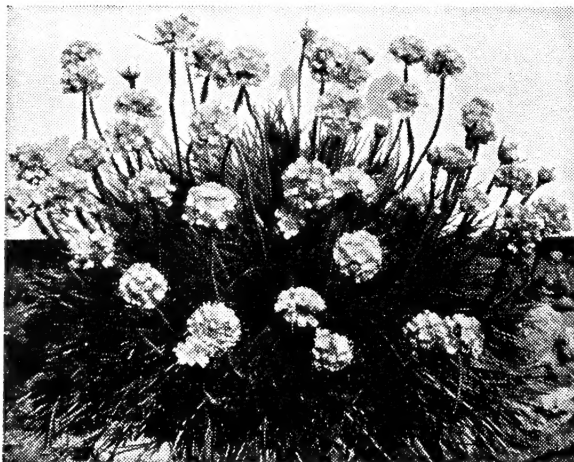

Albida Pink Charming—A very robust form with large flowers of pink. Very hardy, requiring plenty of sun and thriving even in poor soil. Should be sheared back severely after blooming. 6 inches high. 50c.

Ferdinandi-Corburgii — This plant makes neat carpet of emerald green year around, covered with white flowers in spring. 6 inches high. 75c.

Albida Fl. Pl.—Grey green foliage and double white flowers on 8-inch stems. Excellent cut flowers with Primula and Heuchera. 50c.

ARENARIA (Sandwort)

Montana — Close tufts, profusely covered with small, silvery white flowers quite early in the season. Excellent as an edging plant in formal gardens and for rockeries in sunny places. The flowers in May resemble small white up-turned Morning Glories. 4 - 6 inches high. 50c.

ARMERIA

PINK ARABIS

ARMERIA (Thrift or Pincushion)

Nana—This is one of the most persistent flowering plants. The bright rosy red or pink flowers on 6- to 8-inch stems from spring to late summer. 35c.

Bees Ruby — Robust and having large flower heads on 12-inch stems, deep pink. 50c.

Juniperifolia — Pink and rose shades, very dwarf. 75c.

ARTEMISIA

Frigida—Bushy evergreen plants 1-2 ft. tall. Its great beauty is in the shimmering silvery foliage throughout the year. Rare. 75c.

ASARUM (Wild Ginger)

Asarum—A native ground cover for shady places, and woodsy soil. The maroon flowers are interesting but these are mostly foliage plants. 35c.

ASTER FRIKARTI

ASTERS

Alpine Aster—Blue daisy-like flowers 10 inches high. Blooms in late spring. The plant is a neat mound the year around. 50c.

Climax—The old favorite. Large lavender flowers with golden yellow disc. 3-4 ft. tall. Early fall. 50c.

Frikartii Wonder of Stafa—Considered the best of the late summer and early fall flowering varieties. It is attractive in its neat upright free-branching habit of growth, attaining a height of about 24

inches. The large well-formed blooms are produced in great profusion from the middle of August until late fall. They are a lovely lavender-blue color. Fine cut flower. 75c.

Harrington's Pink—The only truly pink aster. Plants are 3-4 ft. tall and sturdy branches bear the huge blossom clusters. Striking. 75c. Early fall.

Red Rover—The buds are bright red, the open flowers being a rosy red with golden centers. Of compact habit and very free blooming. Early fall. 50c.

SHASTA DAISY—CHIFFON

Violetta—Large flowers of violet-blue, well placed on the stalk in great profusion. 3-4 ft. tall. Early fall. 50c.

AUBRIETA

Aubrieta—One of the most essential plants for the alpine garden or rock walls. At their best when placed to cover the face of a rock, or fall from a crevice of a rock wall. Will grow anywhere and with proper treatment (shearing back as soon as through blooming) will flower from early spring throughout the summer. Varieties are: RED KINK, PURPLE KING, LAVENDER AND ROSE. 50c.

Barkers Double—Guaranteed to be at least semi - double, being grown from cuttings and divisions of plants which have flowered. Colors vary, majority being in the purplish and purplish-red shades; although there are some pinks and lavenders. 75c.

CAMPANULA (Bell Flowers)

Dwarf Sorts

Garganica Erimus—A gem for the rock garden. Forms a low spreading tuft which, in June, is covered with starry light blue flowers having a white eye. Exquisite hanging over a rock. 50c.

Glomerata Acaulis—Large clusters of rich violet flowers on 3- to 6-inch stems. From late spring to midsummer. Very dwarf, compact. 50c.

Portenschlagiana—Has a very long flowering period, June to Nov. Dense tufts of dark green foliage covered with purple-blue bell-shaped flowers on 6-inch stems. 50c.

Pseudo Rainerii—A pretty species growing in compact tufts not exceeding 8 inches high; flowers clear blue, held erect on wiry stems. It begins blooming in June, continuing until October. 50c.

CAMPANULA (Bell Flowers)

Tall Sorts

Persicifolia - Princess Royal — A bright blue, large bells, very fine for the border. Blooms in June-July. 24-30 inches tall. 75c.

Persicifolia-Double White — 24-30 inches tall. 75c.

SHASTA DAISY, ESTHER READ

CHRYSANTHEMUM MAXIMUM (Shasta Daisy)

Chiffon—Large semi-double flowers, the petals somewhat ruffled. Very distinct. 50c.

Esther Read—The first fully double "Shasta Daisy", with large pure white flowers, resembling a double Pyrethrum. Very floriferous, invaluable for border decoration or cutting purposes. One of the finest. 50c.

Marconi—Very large double white Chrysanthemum-like flowers on 24- to 30-inch stems, from May to October, if flowers are kept cut. 50c.

White Swan—The white flowers are formed much like those of Esther Read, but are smaller and more dainty, and stems are slender and wiry. Called Memorial Day Daisy because on that day one can usually cut 20 to 30 blooms from one plant. A delight in garden and cut. 50c.

CAMPANULA GARGANICA

DELPHINIUM

Pacific Strain Hybrids—The most outstanding development in Delphinium hybridization being proclaimed by both amateurs and experts as the most prominent in America, if not in the world, in many different color combinations of shades of blue and near-pinks. 75c, \$1.00, \$1.50.

DIANTHUS

Furst Bismark—Bright rose colored flowers in umbels. 50c.

Low Rose—Has a compact cushion of bluish deep green foliage, always neat. The soft rose flowers are borne above foliage in great numbers. 3 or 4 inches high. 50c.

Neglectus—A most beautiful Alpine pink. Neat tufts, of bright pink with buff revers, on 4-inch stems. 75c.

New Pink—Its cushion may be as broad as 18 inches and the 8-inch stems bear many very fine large soft pink flowers. 50c.

Rose Ann—Makes a very colorful spot in garden of brilliant rose semi-double good sized blossoms. 12 inches high. 50c.

Winteri—Single brilliantly colored flowers. 8 to 12 inches tall. Some with dark centers. Plant forms a neat compact turf. 50c.

DORONICUM

Clusi — Evergreen species, 12 inches. 50c.

DELPHINIUM

GEUM

Plantagineum—Large yellow flowers on 2 to 3 ft. stalks. One of the first border perennials to bloom in early spring, making excellent cut flowers as well as blooming for several months. 50c.

ERIGERON

The Quakeress—A splendid border and cutting variety. The many flowered 18-inch stems bear the discs of soft lavender-pink for weeks. Midsummer. 50c.

Speciosus Grdfl. — Large rosy mauve flowers, with yellow centers, on 18-inch stems. An excellent cut flower. Full sun or light shade. 50c.

Speciosus Grdfl. No. 2 — This resembles the above but is more double and deeper in color. It will go under this name until identified. This plant is without doubt one of the finest. 75c.

ERODIUM

Chamaedryoides Roseum — A charming little sun loving plant. It will stand much heat and dryness, and bear pink flowers on 2-inch stems from mid-spring until frost. 50c.

FUNKIA

Undulata Variegata — Creamy white and green variegated leaves. A perfect plant for a shady spot. Has lavender flower spikes in summer. 35c.

GEUM

Border Geum—Double large red. 24 inches. 75c.
Double large yellow. 24 inches. 75c.

Rijnstroom — Very large coppery orange. 75c. Every perennial border should have a collection of these invaluable plants, attractive 12 months of the year.

Wights Brilliant—An outstanding dwarf evergreen Geum. Scarlet blooms are only 3 to 5 inches above the foliage, requires light shade. \$1.00.

HEDERA HELIX (English Ivy)

Conglomerata—Leaves curled and twisted, very dwarf and a slow grower, excellent rock plant. 35c.

HELIANTHEMUM (Sun Rose)

Boule de Feu—Double red showy small evergreen shrub for planting in walls and dry banks in full sun. Should be sheared after through blooming to prevent them from becoming straggly. 50c.

HEUCHERA SANGUINEA
(CORAL BELLS)

HEUCHERA (Coralbells)

Sanguinea — Coral red flowers, hardy and easy to grow and are among the best for rock gardens and borders. 18-24 inches. From June on. 50c.

IBERIS, HARDY CANDYTUFT

Pink Feather—Flowers small but numerous and of soft pink, very lovely. 50c.

HYPERICUM

RHODOPEUM — A pretty silvery gray foliated mat. Golden flowers in late spring. Thrive in a sunny place in ordinary soil, very good in rock garden. 50c.

IBERIS (Candytuft)

Saxatilis Hybrid—Strong and upright trailer with dark green foliage and heads of closely packed white flowers. 8 inches high. 50c.

Sempervirens Snowflake — Somewhat taller than preceding. 8-10 inches. 50c.

LITHOSPERMUM

Prostratum — Heavenly Blue — An evergreen alpine shrub, wide spreading mats of darkest green, covered with many large sky-blue flowers during spring and early summer and often again in early autumn. One of the most wonderful blues in the garden. It requires an acid soil, composed of good loam, some sand or silt and plenty of leaf mold or peat. Either full sun or light shade. Pots 50c.

LUPINS

Russell Hybrids—Stately and beautiful perennials of 2-3 ft. spikes, extraordinary colors. May-June. 50c.

LYCHNIS

Viscaria Splendens Fl. Pl. — Exceedingly brilliant, attracting attention from a great distance. Red flowers on 12-inch stems well above evergreen tufts. May-July. 50c.

LYCHNIS VISCARIA

NEPETA

Mussini—A plant especially good for rock gardens. Of dwarf compact nature, producing masses of blooms of lavender color of all spring and summer in ordinary soil. Prefers sun. 12 inches high. 50c.

ERIOPHYLLUM LANATUM

Oregon Sunshine—A superb plant from the slopes of Oregon and California. Entirely hardy, most drouth resistant, full sun in ordinary soil. The basal tuft of evergreen foliage is neat throughout the year. Golden yellow daisies in May on 12-inch stems. 50c.

ORIENTAL POPPY

Salmon Queen—Flowers of deep salmon pink. Very lovely grown with Delphiniums. 50c.

PENSTEMON

Gloxinioides (Shirley)—Large flowering, a prolific bloomer, from June until frost. Dark red to apple blossom pink and white. The large rich colored flowers are gracefully placed on stems 14 to 18 inches in length, often 12 to 15 flowers appearing on one plant. (Combine these with Aster Frikartii.) 50c.

PHLOX

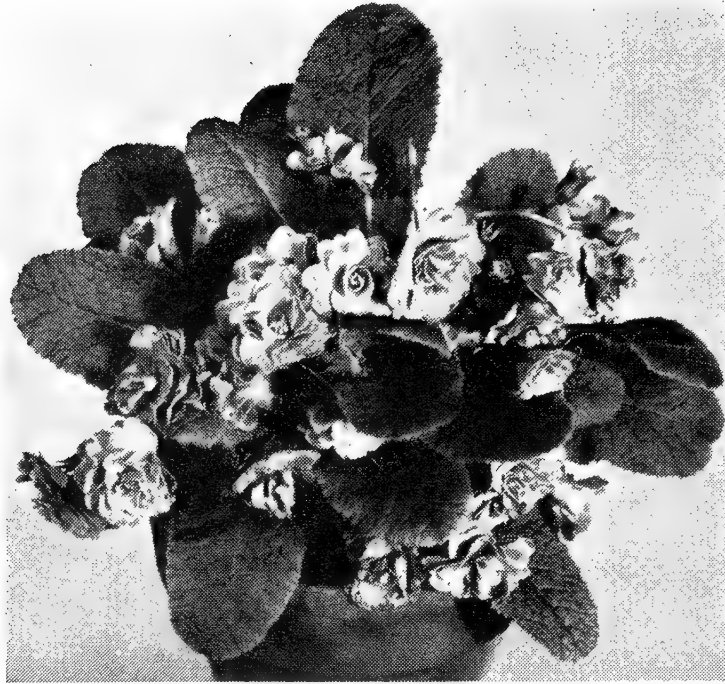

Divaricata—Blooms in April into summer, the 10-inch stems bear airy clusters of quite large fragrant, clear soft blue. Best in light shade, moist rich soil. 50c.

Subulata—(Moss pink)—An early spring flowering type with pretty, moss-like evergreen foliage. During April and May the plant is hidden under the mass of bloom. Very good for the rockery, edging the border or carpeting.

Atropurpurea—Intense red flowers. 50c. **Rosea**—Pink, red eye. 50c.

OREGON SUNSHINE

POLYANTHUS MARIE CROUSSE

PRIMROSES

Hardy Primroses are among the most popular and best known perennials. They are perfect material for the shady garden. Massed under flowering trees and shrubs in the border, they present a magnificent picture from very early spring into summer. Divide them every two, three or four years, depending on variety and what progress they make.

Acaulis — These Primroses start blooming before Polyanthus with a scattering of blooms from fall throughout winter. Blooms on individual stems instead of in clusters. When in full bloom the plant is a mound of color. Wide range of colors. 50c.

Acaulis Blue Gown—A sky blue very floriferous. 50c.

Acaulis DbL. Lavender—This is like a miniature double rose. 50c.

Polyanthus (Many Flowered Primrose)—Of colossal strain. These are early and are very large, are heavy textured and carried in large umbels on sturdy stems. Very wide color range. 50c-75c.

Polyanthus Marie Crousse—A very double light burgundy. Petals laced with white. \$1.00.

Juliae Hybrids—These were introduced into England 1910, since then it has taken many forms and the color range is large. Some creep and spread like a mat over the ground and others form rosettes. Fine in rockeries. 50c. Varieties are: **Alba**, white; **Dorothy**, yellow; **Indian Chief**, wine; **Lodge**, wine; **Schneekissen**, white; **Springtime**, pink.

ASIATIC PRIMULAS

Denticulata—A favorite, originally brought from the Himalayas. Beautiful lavender and white florets, closely set to form a ball on stout stems. 75c.

Florindae—From Tibet comes this moisture loving plant. Bears trusses of fragrant yellow flowers on 3-ft. stalks. Mid-summer bloomer. 50c.

Sieboldii—Handsome and delicate but very hardy. Fine fringed flowers on 10-inch stems. 50c.

CANDELABRA PRIMULAS

Japonica—A sturdy Oriental, ranging in color from white, pale pink through soft pink and rose-pink to cerise. Especially useful where a sequence of shades is desired. 50c.

Japonica Etna—Has large flowers of bright rose-red. Thrives best when naturalized among ferns in sun dappled shade. 75c.

Pulverulenta—Among the choicest of the Candelabras. The farinose stem identifies this species. This is a good variety for planting near pool or stream. 75c.

Pulverulenta, Bartley Pink Strain—This is an extremely beautiful candelabra in salmon pink. 75c.

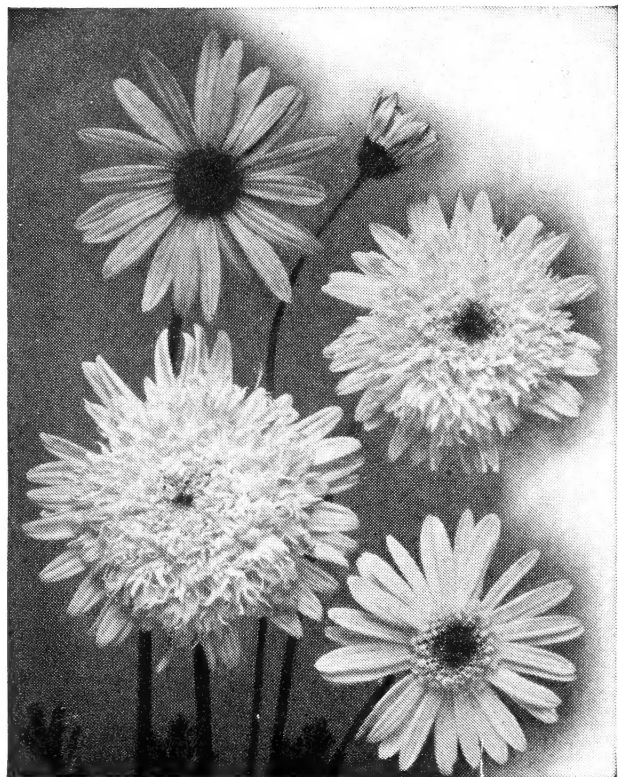

Red Hugh, Hybrid—A candelabra of bright brick or orange red color, very showy. 75c.

AURICULA PRIMULA

Auricula—A long cultivated Alpine Primrose. It forms rosettes of thick smooth leaves, large flowers of various colors. 50c.

PRIMROSE, POLYANTHUS

PYRETHRUM

PYRETHRUM

Pyrethrum—A bright favor of medium size. These come in mixed colors of pink and rose shades, single and double. 50c.

SEMPERVIVUMS (Hen and Chickens)

Sempervivums are intriguing little plants for rock gardens, for walls or for special little colonies and every garden has a place for some of them. In sun or shade. 10 fine colored sorts. Collections not less than 5, at \$1.50, all 10 at \$2.50.

THYMUS (Thyme)

Thymus — Very useful, fragrant free-flowering plants. The creeping sorts are most useful in rock gardens and for flagstone work. They like a warm sandy soil in full sun. Blooms in late spring. We offer three colors, all creeping.

White Wooly Sort—A silvery green mat covered with white flowers in late spring. 35c.

Lavender Sort — Dark green mat covered with lavender flowers in late spring. 35c.

Purple Sort—Dark green mat covered with purple flowers in late spring. 35c.

VERONICA

Blue Spire—Dark blue spikes on 2 to 2½ ft. stems. A very wonderful hardy border perennial, blooms mid-summer and much thereafter if faded spikes are removed. 75c.

Maretima — Exquisite royal blue spikes 2 to 3 ft. Its requirements are same as above. 75c.

Blue Trailer—Forms a dark green mat, flowers are of the brightest blue, in late spring, on 3-inch stems. 50c.

VIOLA

A most beloved flower for sun or partial shade. To grow violas well, good soil is a great advantage, although fine results may be obtained from plants planted in any soil that has been well dug, and a heavy dressing of partially rotted manure incorporated at the time of digging.

Prince Charming — A very large dark purple blue viola on long stems. 50c.

Pride of Victoria — Much like the above except lavender blue in color. 50c.

Violas, Mixed Colors—These are seedlings of large flowering hybrids, in many colors of light and dark shades. 35c.

AZALEA

AZALEA, MOLLIS

AZALEA, HINODEGIRI

Hexe — Flower of large size, and crimson red, compact grower and evergreen. Early spring. \$1.00-\$2.00.

Hinodegiri—The scarlet flowers are produced so profusely as to completely cover the plant, evergreen. Blooms very early in spring. \$1.00-\$2.00.

Loraine—Very beautiful large pink flowers. Blooms later than Hexe and Hinodegiri, an evergreen. \$1.00-\$2.00.

Pink Pearl—A beautiful shade of deep tinted pink. Flowers abundantly, and evergreen. Early spring. \$1.00-\$2.00.

Sherwoodi—A fine orchid shade. Lovely and a good grower, evergreen. Early spring. \$1.00-\$2.00.

Mollis Hybrids — A larger shrub that loses its leaves in winter. Its exquisite flowers are large and of soft yellow, peach and darker shades. Branches of these make heavenly cut flowers for the house. Blooms in late spring. \$2.00 and up.

SEED

Primula Polyanthus of very large florets and unusual colors, \$1.00 per pkt.

- " **Florindae**—Yellow Bells (tall)
- " **Japonica**—Mixed colors.
- " **Pulverulenta**—Bartley strain 'Pink'.
- " **Pulverulenta**—Rose.
- " **Denticulata**—Lavender Globes.
- " **Auricula**—Mixed colors.

50c per pkt.
